Subject: Microsoft case!

Your Honorable Justice,

I was most concerned to read that AOL has filed another lawsuit, and that the Microsoft lawsuits might go on for a longer period of time. I realize Netscape wishes to complain of competition problems, but in truth, as a consumer, God help me if I have to use Netscape software. I believe it is inferior to Microsoft products, and I want the freedom to chose the best product from the best company, and I do not want Microsoft to have to spend their profits on lawsuits. I want them to continue with research and development, so they can continue to provide the consumer with good quality products. Developing superior products seems to be their only "crime." This has gone on long enough.

Sincerely,

Linda Kluthe
